Experience

- UI/UX Designer**
Avanceon Private Limited May 2024 - Present (4 months)

As a UI/UX designer at an automation control system company, I specialize in creating intuitive and visually appealing interfaces for websites, apps, and control systems. My role is to enhance user experience by crafting efficient layouts and seamless interactions that align with both technical requirements and user needs

- UI/UX Designer**
Swati Technologies Nov 2024 - May 2024 (6 months)

My role is to enhance the user interface and experience of different products like ERP Systems, SAAS Products, and other various products to meet the user requirements for a better user experience and visually appealing end product..

- UI/UX Designer**
GTek Solutions Dec 2022 - Nov 2023 (11 months)

My role was to design user interfaces and experiences that make our products not only easy to use but also visually appealing. My role is all about enhancing the way customers interact with our digital products.

- UI/UX Designer**
Dev Dimensions Sep 2021 - Dec 2022 (1.3 Years)

I worked on user interfaces and experiences for diverse projects. With a focus on meeting the unique requirements of each project, I collaborate closely with teams to research user needs, design intuitive interfaces, and ensure a visually appealing end product.
